

## 1. Preview

- As a student who is anxious about publishing my resume publicly,
- I would like to see exactly how it would appear before I publish it,
- So that I can verify my file and check for errors

## 2. Makes sense

- As someone without much experience in browsing websites and digital submission,
- I would like the UI to be simple and intuitive
- So that I can utilize the software with ease and without confusion

## 3. Go-getter

- As someone who values research a lot
- I want to see other people's resumes collected into a convenient organized manner
- So that I can review other works to improve my own

## 4. Upload Resume

- As a student or faculty member,
- When I log into the website, I want to be able to upload my resume quickly and easily by selecting the file from my computer,
- so that it is stored on the website for future use.

## 5. Search Resumes

- As a recruiter,
- When I visit the website,
- I want to use the search bar to find specific resumes by keywords or names,
- so that I can easily locate potential candidates for open positions.

## 6. Alphabetical Listing

- As a user,
- When I upload my resume,

- I want the website to automatically organize all resumes in alphabetical order by last name,
- so that the list is easy to navigate.

#### 7. View Resumes

- As a visitor,
- When I browse the resume listings,
- I want to click on a name and be able to view the full resume in a new tab or window,
- so that I can evaluate the applicant's qualifications.

#### 8. User-Friendly UI

- As a student,
- When I access the website,
- I want to be guided by a clean, intuitive interface that clearly indicates how to upload, search, and view resumes,
- so that I can navigate the site easily without needing additional help.

#### 9. Delete Resume

- As a user,
- When I no longer want my resume stored on the website,
- I want to be able to delete my resume permanently,
- So that my personal information is no longer accessible. Detail: A "Delete" option should be available on the user's profile, allowing them to permanently remove their resume from the database.

#### 10. Sort by Upload Date

- As a recruiter,
- When I am browsing resumes,
- I want to sort resumes by the most recent upload date,
- So that I can review the latest candidates first. Detail: The sorting function should allow users to choose between alphabetical order and upload date for convenience.

#### 11. Filter Resumes by Skillset

- As a recruiter,
- When I am searching resumes on the website,
- I want to filter resumes by specific skills or qualifications,

- So that I can quickly identify candidates who meet the job requirements. Detail: Filters can include categories such as technical skills, certifications, or educational background.

#### 12. Generate Resume

- As a user,
- When I access the website without having made a resume,
- I want to be prompted to enter the required professional information and specify the role I am applying for and have the platform generate a clean pdf formatted resume for me based on my entire experience and target role. The resume will abide by industry best practices and will be ATS-optimized for the specific role.

#### 13. Edit resume

- As a user,
- I want to upload my existing resume and have a cleaner and optimized version regenerated,
- or I want to upload my resume and specify new experiences or updates to be made and have a new version created, still maintaining the 1-page limit thus taking out less relevant information.

#### 14. Download resume

- As a user,
- I want to be able to download all resumes uploaded to or generated on the platform
